If you attended our recent event on e-Invoice from a software perspective, we highlighted the need to access all Documents and Notes pertaining to e-Invoice. E.g.

1. The AR/OE Invoice from Sage 300 is not an e-Invoice but your customer will receive the e-Invoice generated by the IRBM MyInvois Portal.
2. There will be transactions in GL that you need to access e-Invoice documents and perhaps you would like to include some important notes for transactions with no e-Invoice.

Orchid Systems, a Sage 300 3rd party developer has the solution when Malaysia implements e-Invoice
